

JOHN HANCOCK **2016**

Cost of Care Survey

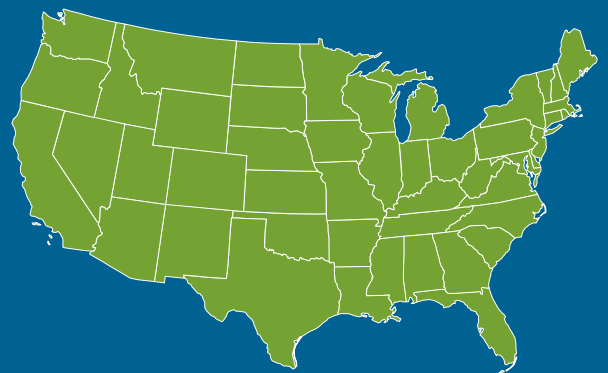

The 2016 Cost of Care Survey

Understanding the latest data and trends in the cost of long-term care (LTC) services is an important aspect of long-term care planning for consumers and LTC insurance professionals. John Hancock's 2016 Cost of Care Survey can help individuals and their families plan for a possible future long-term care event by providing them with the potential costs. The information found in this report is intended to help aid in the LTC insurance purchase decision, as well as give insight into appropriate policy design.

Key Findings

The results of John Hancock’s 2016 Cost of Care Survey indicate that the cost of long-term care services continues to rise as reflected by the results below.

National average costs for long-term care services

Over 16,000 care providers across the nation were surveyed in 2016. The chart below reflects the national average cost of long-term care in various care settings, ranging from facility care, to care received in a home setting.

FACILITY-BASED CARE	2016 NAT. AVG. (1-YR.) ¹	2016 TYPICAL UNIT COST ¹
Nursing Home: Private Room	\$102,930	\$282 daily
Nursing Home: Semi-Private Room	\$91,615	\$251 daily
Assisted Living Facility	\$47,064	\$3,922 monthly
HOME AND COMMUNITY-BASED CARE	2016 NAT. AVG. (1-YR.) ¹	2016 TYPICAL UNIT COST ¹
Home Health Care Aide	\$32,760 ²	\$21 hourly
Adult Day Care	\$20,540 ³	\$79 daily

Trends in the cost of care

The chart below shows the average annual increase in long-term care costs over the last eight years across various care settings.⁴

LONG-TERM CARE SETTING	AVG. ANNUAL INCREASE (8-YR.) ⁴
Nursing Home: Private Room	3.1%
Nursing Home: Semi-Private Room	3.2%
Assisted Living Facility	2.1%
Home Health Care Aide	1.5%
Adult Day Care	1.5%

1. Costs rounded to the nearest dollar.

2. Based on care received for six hours a day, five days a week.

3. Based on care received five days a week.

4. The 8-year average annual increases are based on a subset of common providers from our 2008 and 2013 Cost of Care surveys and our 2013 and 2016 Cost of Care surveys.

General Observations

- Costs have risen for all care options, with assisted living facilities seeing the most significant increases since 2013, likely due to increasing demand.
- The home health care industry has undergone a number of consolidations, which may reduce the number of local agencies available to consumers.
- Cost trends continue to vary significantly by region.

How to use this Information

- Think about what city or state you may be living in when you need care.
- Refer to the cost of care chart or map on our website to find today's costs for your preferred care setting in your local area.
- Factor in these costs as you choose an appropriate daily or monthly benefit and inflation option.

John Hancock data reveals that most of our claimants receive care at home, according to their preference.

Methodology⁵

John Hancock contracted with LifePlans Inc., based in Waltham, MA, to conduct the 2016 Cost of Care Survey of long-term care settings across the United States. More than 16,000 providers, inclusive of nursing homes, home health care agencies, assisted living facilities, and adult day care providers, participated in a telephone survey.

5. This information serves as a guide to the latest costs and trends across all long-term care settings. Actual costs vary by provider. The survey data is intended to give you a better understanding of potential long-term care costs and help you make appropriate recommendations for long-term care insurance benefits.
